

Solution Developer's Kit (SDK)

Specifications

Type: Software code for TRH-1000 and SmartReader Plus, JR, and Nautilus series data loggers

The ACR Solution Developer's Kit is an all-in-one software and hardware kit designed to assist implementers and integrators in creating customized data logging solutions with ACR products.

CUSTOM SOLUTIONS

Get the benefits of using a high quality ACR data logger in custom solutions. Use the SDK to create applications that will interact and manipulate any of the supported ACR data loggers (see Compatibility section below) so you can integrate with 3rd-party applications.

COMPATIBILITY

The ACR SDK can be used in VB, VC++, Java and VBA Editor designing environments. There is an SDK available for each of the following ACR data loggers:

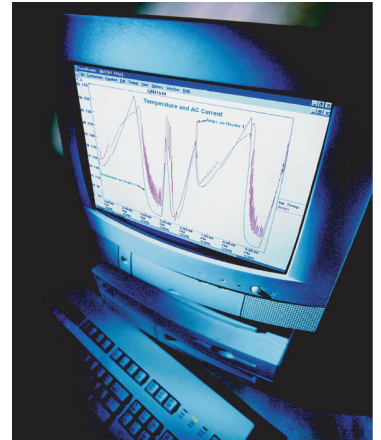

- JR series
- TRH-1000
- Nautilus series
- SmartReader Plus series

FREE TECHNICAL SUPPORT

With the purchase of the full version SDK, you receive 90 days of free technical email support from ACR's highly qualified development staff.

INCLUDED IN KIT:

- COM control for specified ACR data logger
- One ACR data logger with appropriate cabling for providing communications
- Sample applications (VB and C++)
- User documentation
- 90-day email support (activated upon receipt of warranty card)

Model#:	Cat#:
SDK (for SRP and Nautilus)	01-0900
SDK (for JR and TRH)	01-0901

Note: Please specify exact data logger model when ordering (i.e. SRP-007-25mA, 128 KB)
